

ESCP Hybrid multi-site TAMIS course

Friday 10 May 2024

Rationale:

After a successful first edition in november 2021, ESCP is proud to announce the second Edition of this multi site hybrid hands-on TAMIS course on **Friday 10 May 2024**.

TAMIS local excision for complex benign lesions and early rectal cancer has become an established treatment approach, and this workshop is an essential first step on the learning curve before clinical implementation.

This course will be hybrid with a virtual program in the morning and hands-on practical program in the afternoon.

08:30 Arrival and Welcome
